OCC may have mentioned an estimated volume, but none of their investigation reports for the sites they have visited have a volume.

I've attached the latest map. Shows spill pathway from northern most site (Hewitt Unit 15) to southern most site (Pinkston).

- Distance from Hewitt Unit to Pinkston = 9.34 miles
- Distance from Hewitt Unit to Love County line = 21.1 miles

The map has the township layers. I'll have to see if they can add a section layer as well.

I thought the OCC mentioned yesterday that tripledee had lost 300+ bbls?

Volume released from Tripledee is unknown. NRC have OCC investigation reports don't have volume numbers.

Thanks. That what I thought. If you add the volumes of oil, that'd give us a great metric for tomorrow. Basically 2443 bbl plus Ddd.

Good work today.

Subject: NRC's

Chris asked that we give him the number of NRC reports that would be included in a flood impacted zone. I can count 12 right now, but will double check in the morning.
